

PUUC Air Mitigation Set-up for Sanctuary Use Updated 9/29/21

1) The sanctuary has 4 HEPA air purifiers, one in each of the 4 corners of the space.
Turn each one on as follows:

1a) Push power button on (picture 1).

2) Set air flow to lowest setting. (Picture 2.)

Picture 1. Power button.

Picture 2. Air flow indicator.

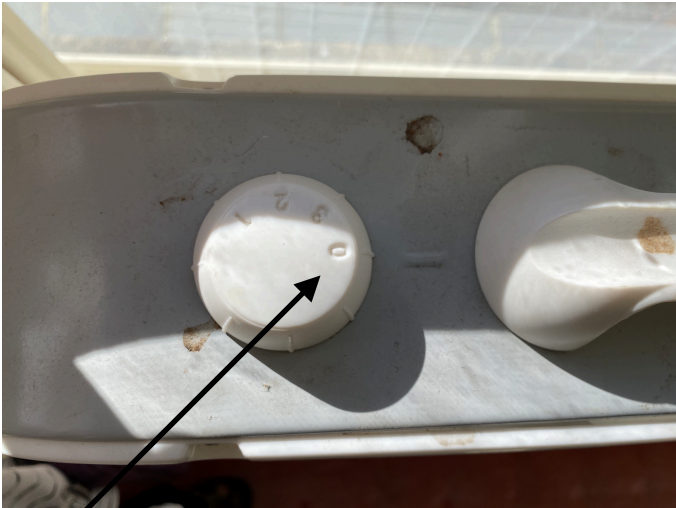

There are 3 window fans.

3) Locate plexiglass shield behind the fan. Lift the plexiglass out and place safely in the pew.

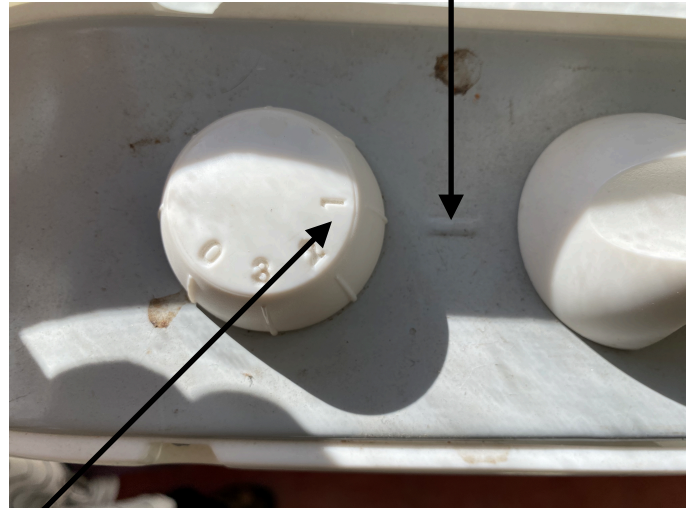

3a) Locate the on/off knobs. Picture 1 is in OFF position, number 0.

3b) Picture 2 is in ON position, number 1 (turned all the way to the right). Notice how the numbers on knob align with the small dash on the top of fan. Turn fans on.

{Picture 1}

(Picture 2)

To turn off HEPA purifiers and fans, reverse steps above.

Thank you!
